

# LinkedIn Banner Template

This template looks deceptively simple but the size of the grey area has been carefully calibrated so that it includes the area covered by your profile photo on both a desktop and a mobile phone.

You can use the entire space for your image but just make sure that you have no text or critical parts of the image within the grey area indicated here.

Be sure to respect the ratio and pixel size here or else your image will be cut off.

When you are done, upload your banner image and then view it from your desktop and your phone to make sure it all looks professional.

Click on this link and then click SAVE AS to make a copy to your computer before modifying!
